The New Line Through Central Wyo.

The Burlington-Colorado & Southern joint main line between Denver, Cheyenne and Billings was opened October 18th. The new line directly connects Denver and Cheyenne with the fast developing localities about Douglas and Casper, with the famous hot springs resort, Thermopolis, and with the rich agricultural section of North Wyoming—the Big Horn Basin. It is unusually fortunate in its geographical location, as it traverses Wyoming's new agricultural and industrial localities, and connects the whole with the Burlington transportation system so closely as to lead to a rapid development of the state of Wyoming.

Ask for the Burlington's Red Folder; note the relation of the new railroad to the Burlington System east thereof. This new road illustrates the steady pioneer work of the Burlington in its effort to open up the best agricultural, live stock, and mineral regions of the West.

Tell your friends back east about the new line and the possibilities of increased land values in Wyoming and the North Platte Valley.
